DETAILED ACTION

Election/Restrictions

1. Applicant's election of Species A, figs.8,9, claims 1-4 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Note applicant's attorney should sign on the bottom of response of election restriction requirement filed 03/21/05. Appropriate correction is required.

Information Disclosure Statement

2. If applicant is aware of any relevant prior art, he/she requested to cite it on form PTO-1449 in accordance with the guidelines set forth in M.P.E.P. 609.

Specification

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Drawings

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, said mesas surrounded on the four sides; said U-shaped pn junction having selectively and heavily doped regions formed on the

bottom of said U-shaped pn junctions for the formation of gate ohmic contacts; said U-shaped junctions having ohmic contacts; and said semiconductor structure having a top source layer as recited in claim 1 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

5. Figures 1-7 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 19,20, "said U-shaped pn junction having selectively and heavily doped regions formed on the bottom of said U-shaped pn junctions for the formation of gate ohmic contacts" is unclear as to what does applicant mean by said U-shaped pn junction having

selectively and heavily doped regions formed on the bottom of said U-shaped pn junctions for the formation of gate ohmic contacts?

line 31, "a top source layer" is unclear as to whether it is being referred to the top source layer as a top layer as source layer of said transistor as recited in lines 6,7 of claim 1.
